The open-hearted sister - Frauscher 1017 LIDO

Gmunden, 12 June 2012:

Similar, yet very different but just as impressive. That is how she will present herself, the open-hearted sister of the 1017 GT. There is already an initial illustration of the second of the power twins. This even now shows a number of very promising and exciting details.

The concept is clear: The aim is to experience absolute travelling pleasure, and to be able to share this with as many people as possible. The generous, open construction and the elegant lounge area will contribute to the enjoyment of stylish and comfortable trips for at least 12 people.

Not yet on show: A Bimini canopy for the forward and stern lounge areas, which provides protection from excessive sunshine. The two tables in the bow area can be lowered and very simply converted to a generous area for stretching out and relaxing. A toilet is hidden in the steering position; this allows the passengers to enjoy even longer trips.

The basic fitting-out with 2 x MERCURISER 350 MAG engines with 300 HP and Z-drive is identical to that of the 1017 GT, and will fulfil every wish in terms of power, speed, and handling, for the 1017 Lido as well. Anyone who knows the „engineers of emotions“ can expect that this will probably not be the final word.

The 1017 Lido will be presented for the first time in autumn 2012.
