

**Press Release, Barracuda Racing Wheels Europe:
Striking rim specimen for the Hyundai i30 – the Tzunamee EVO**

For many years, models by Hyundai have stood out thanks to their high quality and good value for money. Which is why the Koreans sometimes make even the established German elite quake in their boots – especially with the compact model. The top version of this – the i30 N – is a true champion that is tearing up the hot hatch rule book and enjoying enormous popularity. Because the vehicle is often upgraded and customized, Barracuda Racing Wheels has brought in the brand-new rim model Tzunamee EVO for this very vehicle.

The 8.5x19" ET40 wheels are mounted on the axles of the i30 N and fitted with 225/35R19 tires. The Tzunamee EVO knows how to cause a visual sensation with its extraordinary asymmetrical Y-spoke look, but it delivers its killer blow with a dark gunmetal brushed finish, with the fronts of the V-shaped spoke ends being brushed. Not only this – the rims are characterized by a high load-bearing capacity. The price comes to €339 apiece.

To top it all off, the integrated KW Variant 3 coilover suspension (from €1,849) lowers the chassis by 45 mm at the front and 40 mm at the back.

There are also breathtaking videos from Barracuda on the "Barracuda Racing Wheels" YouTube channel or the "barracuda.wheels" interactive Instagram profile. The light-alloy wheels from the extensive Barracuda range of rims are available at car dealerships or well-stocked tire and specialist stores. Alternatively, they – along with all additional facts, including price and delivery information – can be obtained directly from:
