

# MOBILITE

Urban | E-bike | Commuting

| Special in every way. That's the new MET Mobilite, with a contemporary design and a casual look. It's made to leave conventions behind.

| The MET Mobilite is exceptionally safe and packed with all of the features needed for the city. The helmet's fastening clip is covered with a soft padding. It has an anti-insect net embedded into the front vents to protect you from unexpected bites. Last but not least we've designed a custom LED light which snaps in and out of the rear vent to ensure you are visible on the road.

| The MET Rear LED Light attaches tool-free to your helmet vent and provides a fixed and blinking light mode to keep you visible. It features 4 LED spotlights and has a battery lifespan up to 40 hours of use.

| One of the hallmarks of the Mobilite is its incredible comfort. The 360° head belt ensures that there are no pressure points on the skull and thanks to its internal shape it will go unnoticed on your head. The Safe-T Mid retention system can be micro-adjusted to achieve the perfect fit and has a soft padded neck support. If you need extra room for your head the size chart goes up to the XL.
