

**Pressemitteilung Cor.Speed Sports Wheels:
Ford Mustang with Cor.Speed Deville Wheels**

With their sixth generation Mustang, Ford finally turned their legendary Pony Car into a global player. Blessed with an outstanding price / performance ratio, the new Mustang was the best-selling sports car in the world last year, and a sensational sales success in Europe.

This was reason enough for Cor.Speed Sports Wheels and its sister brand, Barracuda Racing Wheels, to develop a range of 19 and 20-inch wheel designs for the American phenomenon.

The Cor.Speed Deville alloy wheel design, shown here in its basic silver brushed clear lacquer finish, is sized 9.0Jx20-inch (front, 449 euro) and 10.5Jx20-inch (rear, 479-euro) and shod with 255/35R20 and 275/35R20 tyres. This ten-spoke wheel is also available in a darker Gunmetal Matt finish.

The KW Variant 3 fully adjustable suspension kit (2,149 euro), installed on the car in the photos, has been set to lower the ride height by 45 mm in front and 40 mm at the rear, improving the cars stance and handling.

JMS Fahrzeugteile, the company responsible for the distribution of the Cor.Speed and Barracuda wheels in Europe, also retail other tuning components such as sports exhaust systems and aerodynamic parts.

For example, a high-performance exhaust manifold including metal catalytic converters from the Schropp Tuning range is offered for 2,999 euro. Power junkies will appreciate the Schropp Tuning supercharger conversion, which lifts the output of the Mustang GT's V8 motor to 590 hp, with 725 Nm of torque. The 15,999 euro price tag includes installation by Schropp tuning.
