RACING WHEELS

Press Release, Barracuda Racing Wheels Europe: Barracuda Tzunamee EVO on the Hyundai i30 N – a hot hatch shooting star

What do the Hyundai i30 N and the Barracuda Tzunamee EVO have in common? It's simple: both are currently extremely popular in the tuning world. We've brought these two stars of the scene together at long last and the result is truly a sight for sore eyes.

The Tzunamee EVO rims with their striking, asymmetrical Y-spoke design are fitted on the axles of this compact, red Hyundai sports car, measuring in at 8.5x19" with a rim offset of 40 and a 5x114.3 bolt circle. Finished in dark gunmetal, they provide a stark, dark contrast to the vibrant paintwork of the 275 hp i30 N Performance.

The Pirelli P Zero tires measure 235/35R19. A KW Variant 3 coilover suspension lowers the chassis, ensuring the new wheels slot perfectly beneath the fenders. The final highlight is on the aggressively designed spoiler, where the owner has connected two Akrapovic tailpipes to the factory cat-back valve exhaust system.

Breathtaking videos from Barracuda are available on the 'Barracuda Racing Wheels' YouTube channel or the 'barracuda.wheels' Instagram profile. The light-alloy wheels from the extensive Barracuda range of rims are available at car dealerships as well as well-stocked tire and specialist stores. Alternatively, they – along with all additional facts, including price and delivery information – can be obtained directly from:
