

## **Press release Barracuda Racing Wheels Europe Barracuda meets Giacuzzo: Individual Kia Ceed duo on Dragoon wheels**

With their car models, the Koreans have long since developed from a newcomer from the 1990s, which actually only scores with the low price, to a real alternative and provider of high-quality vehicles. For example, the Kia Ceed has been able to annoy the established competition à la VW Golf and Co. for years. With the GT and GT Line versions that have been available for a number of years, Kia also appeals to petrolheads and tuning fans. This is also proven by these two specimens, each of which was placed on a high-quality wheel set of Barracuda Racing Wheels.

Both cars roll the Dragoon rims, which are characterized by a dynamic, asymmetrical design. The wheels belong to Barracuda's Ultralight Series and are accordingly manufactured using the weight-saving flow-forming process. The dimensions are 8.5x19 inches all around, the tires measure 225/35R19. There is one difference, however, with regard to the finish: The black Ceed GT carries the Dragoons in high-gloss bronze. The other vehicle is a silver example of the five-door Shooting Brake variant Proceed GT, already in the facelift version: the rims have a Gloss Black finish. With regard to the additional lowering, there is agreement again, it is achieved using Eibach components.

A body kit from Giacuzzo also ensures even more visual sharpness and individuality in both cases: The Ceed has a glossy black racing roof spoiler, a rear diffuser and a front spoiler lip. The Proceed features a front spoiler, side skirts, a roof spoiler and a rear diffuser.

Stunning videos of Barracuda are available on the Barracuda Racing Wheels YouTube channel or interactively on the barracuda.wheels Instagram profile. The alloy wheels are available from the extensive Barracuda wheel range in car dealerships or well-stocked tire and specialist shops. Alternatively, they are available, along with all other facts, as well as price and delivery information, directly from:
