

**Press release Barracuda Racing Wheels Europe:
Cologne Hot Hatch Focus ST on 19-inch Ultralight Project 3.0 wheels**

In the absence of a new edition of the Focus RS, the ST has once again taken over the role of the top model in the current fourth generation of Ford's compact class, which has been built since 2018. Offered as a hatchback and a station wagon called Turnier, the sports car is now only available with a 280-horsepower gasoline engine, while the alternative 190-horsepower diesel version has been discontinued. The ST specimen presented here by JMS Fahrzeugteile received extensive customization with, among other things, a high-quality set of Barracuda Racing Wheels.

The Ford's axles are fitted with Project 3.0 rims. They come from Barracuda's Ultralight Series and are manufactured using the innovative, weight-saving flow forming process. They also feature a modern Y-spoke design and a Black Milled finish, with a patented milled spoke contour acting as an absolute eye-catcher. The dimensions are 8.5x19 inches all around and the associated tires measure 235/35R19. The perfect alignment of the combinations under the wheel arches is due on the one hand to wheel spacers at the front and rear and on the other hand to a KW Variant 3 coilover suspension.

The new look of the hot hatch is rounded off spectacularly by a striking full design foil from Schwabenfolia. The multi-colored styling in graffiti look is composed of black, white and red surfaces. Last but not least, a new exhaust system from Friedrich Motorsport gives the ST a much more distinctive and rich sound.

Breathtaking videos from Barracuda are available on the YouTube channel "Barracuda Racing Wheels" or interactively on the Instagram profile "barracuda.wheels". The alloy wheels from the extensive Barracuda wheel range are available from car dealerships or well-stocked tire and specialty retailers. Alternatively, they are available, as well as all other facts and price and delivery information, directly from:
