

**Press release Cor.Speed Sports Wheels Europe:
Cor.Speed meets TOSE-tuning.de – Mazda CX-5 on 22-inch Cor.Speed Deville**

Large-format alloy wheels in the 22-inch category are usually expected on bulky, lavishly dimensioned vehicles such as luxury sedans and upper-class SUVs like the BMW X5, Audi Q7 and Co. The guys from TOSE-tuning.de and Cor.Speed Sports Wheels now impressively prove that wheels of this size are also ideal for smaller mid-range SUVs.

The dynamically designed, Japanese SUV stands on a set of high-quality Cor.Speed Deville rims, which are characterized by ten powerful and straight-lined spokes and a considerable concavity. The dimensions of the wheels with a silver brushed finish are 9.5x22 inches all around, the corresponding tires measure 265/30R22.

With this special conversion, which also includes a K-Custom coilover kit for a significant lowering and thus a sportier look, TOSE-tuning realized the proper entry of this wheel/tire combination in to the vehicle documents.
