

**Press Release, Barracuda Racing Wheels Europe:
18" Barracuda Shoxx on Audi A1**

Since 2010, Audi has been offering its customers the A1, one of the highest-value and most fashionable representatives of the compact car, to take on lifestyle competitors such as the MINI. This concept also makes it well suited to serve as a basic vehicle for subsequent customization.

For proof, you need look no further than this specimen of the Audi small car with a set of 8x18" Barracuda Shoxx wheels installed on its axles. The look of the double spoke rims with 215/35R18 tires is brought out by a finish in matte bronze. Thanks to a special protective paint job, they – like all monochrome Barracuda Racing Wheels – are also well equipped for winter use.

To complement the new set of wheels, the A1 was also given a KW Variant 1 coilover (969 euros) to lower the front axle by 45 millimeters and the rear axle by 40 millimeters. Another real eye-catcher is the special red paint job. Thanks for help implementing this Audi goes out to Mr. Garbe from Autohaus Wentorf & Schenkhut.
