RACING WHEELS

Press release Barracuda Racing Wheels Europe: Popular British small car on a big foot - Tzunamee EVO on the MINI Cooper Cabrio

With the large-scale revival of the MINI brand from 2001 onwards, BMW achieved a real coup. The portfolio includes not only the original small cars, but also, as is well known, various other variants that have clearly outgrown this class - such as Clubman and Countryman. What all versions have in common is that they are extremely popular and celebrate impressive successes. In the tuning area, the sporty versions Cooper S and John Cooper Works in particular met with a great response. But the convertible shown here shows that the slightly more well-behaved MINI Cooper can also be customized in the form of a high-quality wheel set from Barracuda Racing Wheels.

The British open-air fun-maker, painted in bright red, has the trendy Tzunamee EVO alloy wheels in the dimensions 8x18 inches with a dark gunmetal finish, including partially brushed fronts. The mounted tires measure 215/40R18. In order to adjust the new wheel / tire combinations harmoniously under the fenders, H&R lowering springs were installed on both axles, which reduce the ground clearance by around 35 millimeters.

Breathtaking videos from Barracuda are available on the YouTube channel "Barracuda Racing Wheels" or interactively on the Instagram profile "barracuda.wheels". The light alloy wheels from the extensive Barracuda rim program are available from car dealerships or from well-stocked tire and specialist shops. Alternatively, they are available as well as all other facts as well as price and delivery information directly from:
