RACING WHEELS

Press release Barracuda Racing Wheels Europe Stuttgart V8 coupé C 63 S on Barracuda Karizzma wheels

The AMG C 63 S from the 205 series is undoubtedly still a real dream car for many fans of the brand with the star. And as is well known, it is probably the last representative of a dying species in the Stuttgart middle class, namely the top models with the famous biturbo V8. Even though the AMG comes across as quite extroverted ex works, many owners resort to subsequent customization - as in the example shown here, which stands on a set of high-quality wheels from Barracuda Racing Wheels.

The team from Urban Motors, Barracuda sales partner in Eschweiler near Aachen, mounted Karizzma wheels in the dimensions 9x20 inches and 10.5x20 inches and with the matt black "PureSports" finish. They are fitted with Michelin Pilot Sport 4 S tires in 255/30R20 and 285/30R20. For perfect alignment in the wheel arches, 16 millimeter spacers at the rear and a lowering of 35 millimeters at the front and 30 millimeters at the rear are used. The latter is thanks to KW coil springs. The setup described did not require any body work.

In addition, all emblems and lettering are blackened to match the wheels and the matt black paintwork of the coupé. And last but not least, Urban Motors also worked on the engine and ensured an increase in performance to 590 hp and 770 Nm maximum torque.
