A4 Avant eyecatcher with Schwabenfolia wrapping on Barracuda Tzunamee EVO

The Audi A4 of the current B9 generation has now been available for a remarkable seven years. While the model change to the successor - the last of its kind with combustion engines - is already clearly in the offing, the previous vehicle is still doing well on the market. No wonder, since the A4 is a pleasingly designed car that still knows how to please with its design today. The popular Avant version of the Audi is all the more chic when, like this example, it received an individual refinement and was placed on a set of high-quality Barracuda Racing Wheels.

The vehicle was created as part of a cooperation between JMS Fahrzeugteile and the Barracuda Racing Wheels and Schwabenfolia brands.

While the latter are of course responsible for the eye-catching design wraps on the Audi, the choice fell on the trendy Tzunamee EVO wheels from the Barracuda range. The rims with styling in the distinctive asymmetrical Y-spoke design are mounted all around in 9x20 inches.

The associated Hankook Ventus S1 evo3 tires have the dimensions 245/35ZR20. And last but not least, the Ingolstadt station wagon received a rounding-off lowering: a KW Variant 3 coilover kit lowered the body by around 40 millimeters.

Stunning videos of Barracuda are available on the Barracuda Racing Wheels YouTube channel or interactively on the barracuda.wheels Instagram profile. The alloy wheels are available from the extensive Barracuda wheel range in car dealerships or well-stocked tire and specialist shops. Alternatively, they are available, along with all other facts, as well as price and delivery information, directly from:
