

**Pressemitteilung Cor.Speed Sports Wheels Europe:
Noble shoes for the racy Italian: Maserati Quattroporte with Cor.Speed Deville**

Maserati Quattroporte – already the name of the traditional Italian sports sedan is almost as sonorous as the sound of its engines. For the current, sixth Quattroporte generation, the alloy wheel specialists at Cor.Speed Sports Wheels Europe for example have their elegant Deville wheel in their range.

The one-piece light alloy wheel was mounted to the Italian limousine shown here by Cor.Speed partner wheels4you, located in Hildesheim, in the „Gunmetal Matt“ finish and in the dimensions 9x21 and 10.5x21 inches - combined with high-performance tires of sizes 245/35R21 on the front and 285/30R21 on the rear axle.

Moreover wheels4you installed in-house special sport springs, which reduce the ground clearance and the center of gravity of the Maserati in equal measure and thus inject even more driving dynamics into the 5.26 meter long limo.

Breathtaking videos and pictures from Cor.Speed are available on the YouTube channel "Corspeed Sports Wheels" and interactively on the Instagram profile "corspeed.sports.wheels" or the Facebook page "Barracuda Europe Racing Wheels". The light alloy wheels from the extensive Cor.Speed rim range are available in car dealerships or from well-stocked tire and specialist retailers. Alternatively, like all facts and price and delivery information, they are available directly from:
