

**Pressemitteilung Cor.Speed Sports Wheels Europe:
Strong luxury convertible with fine shoes - Deville on the Mercedes-AMG S 63**

The new generation of the S-Class, the W223, was presented a few weeks ago. While the sedan will continue to be one of the top offers in its segment, the two-door coupé and convertible offshoots will unfortunately be phased out without replacement. In the absence of a successor, the previous models are likely to be very popular with their fans and petrolheads in the future. And so, for example, this copy was equipped with a set of high-quality Cor.Speed Sports Wheels.

At the Cor.Speed distributor TR Exclusive in Kuppenheim near Karlsruhe, the AMG S 63 4MATIC equipped with the 585 hp 4.0 liter M177 biturbo V8 was given a set of Deville light alloy rims in 9.5x22 inch on the front and 10.5x22 inch on the rear axle. The wheels with a light „silver brushed“ finish are mounted in combination with spacers that are 5 millimeters thick at the front and 10 millimeters at the rear. The mounted Michelin Pilot Sport 4 S tires measure 255/30ZR22 and 295/25ZR22. In addition, there was a reduction in ground clearance, for which a lowering module for the factory air suspension that can be controlled via the steering wheel is responsible.
