

MOBILITE MIPS

Urban | E-bike | Commuting

| Complementing urban appeal with functional design. The new Mobilite MIPS is as dynamic as your everyday life.

| The MET Mobilite MIPS is exceptionally safe and packed with all of the features needed for the city. You can easily fasten the helmet's straps with the help of the Fidlock® magnetic buckle. The anti-insect net is embedded into the front vents to protect you from unexpected bites. Last but not least we've designed a custom LED light which snaps in and out of the rear vent to ensure you are visible on the road.

| One of the hallmarks of the Mobilite MIPS is its incredible comfort. The 360° head belt ensures that there are no pressure points on the skull and thanks to its internal shape it will go unnoticed on your head. The Safe-T Mid retention system can be micro-adjusted to achieve the perfect fit and has a soft padded neck support. If you need extra room for your head the size chart goes up to the XL.

| At MET we take your safety very seriously, all of the production batches of the Mobilite are strictly tested in our lab, leaving nothing to chance. Featuring the MIPS-C2® brain protection system, the Mobilite is able to slide relative to the head in the case of a crash, redirecting damaging rotational motion. MIPS is engineered to add at least 10% extra safety to the standard construction of helmets in case of certain impacts.

FEATURES
