RACING WHEELS

Press Release, Barracuda Racing Wheels Europe: New highlight for the Mercedes-Benz V-Class: the Tzunamee EVO rim

The end of 2018 saw Barracuda Racing Wheels present a new highlight in the shape of the Tzunamee EVO wheel. And like its predecessor, the legendary Tzunamee, it's set to gain cult status. While it's been especially prominent on compact vehicles like the VW Golf or Hyundai i30 up until now, here's proof that the Tzunamee EVO looks great on completely other classes of vehicle, too! Barracuda's sales partner and surface finisher SHD from Herne has equipped a Mercedes-Benz V-Class model from the current 447 series with a set of the Tzunamee EVOs.

The V 250 d is fitted with 9x20" rims with 245/40R20 tires all around. Matching the deep black paintwork of the spacious minibus, the dark gunmetal brushed finish was chosen. While in this example a dark gray-black coloring characterizes the rim, bright accents are brilliantly set by the V-shaped end of each of the six spokes because their fronts were brushed subsequently.

Lowering the V-Class by some 40 millimeters, special springs from H&R are also fitted – so that it is not only the new wheels that make the big Mercedes more dynamic on the road.

Breathtaking videos from Barracuda are available on the 'Barracuda Racing Wheels' YouTube channel or the 'barracuda.wheels' interactive Instagram profile. The light-alloy wheels from the extensive Barracuda range of rims are available at car dealerships or well-stocked tire and specialist stores. Alternatively, they – along with all additional facts, including price and delivery information – can be obtained directly from:
