

**Press Release, Cor.Speed Sports Wheels Europe:  
Ford Mustang with Cor.Speed Deville**

One thing is for certain: hardly any other vehicle offers more bang for your buck than the Ford Mustang when it comes to V8 power, sports-car feeling, and the spirit of the American automobile. With that in mind it follows that this pony car, now in its sixth generation and officially available here in Germany, ranks so highly among the favorites of the petrolhead for both rational and irrational reasons.

Needless to say, the Mustang looks even more dynamic and exclusive with high-quality wheels from Cor.Speed Sports Wheels. By way of example, the alloy rim specialists have fitted the American coupé shown here, a fifth-generation Mustang (S197), with their elegant but sporty Deville wheels in the size combination 9x20/10.5x20" (EUR 449/479). The spectacular ten-spoke one-piece rims in a light silver brushed finish with hand-brushed spokes were fitted with 255/35R20 tires on the steering axle and 275/35R20 tires on the drive axle.

The Cor.Speed Deville is alternatively available in darker gunmetal and optionally with different undercut trimlines. In various 20" and 21" combinations, it also fits –with approval, of course – the current Mustang generation (LAE).

The Mustang shown here was also given a KW Variant 3 coilover suspension with adjustable compression and rebound damping, which was lowered to 45 mm on the front axle and 40 mm on the rear axle, and various other exterior styling components.

Breathtaking videos from Cor.Speed are available on the 'Corspeed Sports Wheels' YouTube channel and the interactive 'corspeed.sports.wheels' Instagram profile.
