

**Press release for JMS Fahrzeugteile GmbH:
Schmidt Drago alloy rims for the Audi R8 (4S) Spyder**

With the R8, Audi has been offering a true flagship sports car for 13 years. The second model generation is also a head-turner with its highly unique characteristic look. One example of the current series is the open Spyder model offered since 2016 which has been rendered even more exclusive by the specialists at JMS Fahrzeugteile.

High-end Schmidt Drago light alloy rims are now mounted on the axles of the roadster run by a powerful, naturally aspirated V10 powertrain. The wheels measure 9x20" on the front axle and 11x20" on the rear, and come with 255/30R20 and 305/30R20 tires. Like many factory body components by Audi, the wheels with their glossy black finish offer a striking contrast to the luminous green paintwork of the Spyder.

To add a final touch of refinement, JMS Fahrzeugteile has installed a set of thread suspensions by KW. This not only discreetly lowers the center of gravity but also further improves handling.
