

BARRACUDA

RACING WHEELS

Press release, Barracuda Racing Wheels Europe: Ford Focus top model on chic Shoxx wheels

It has recently become official: the popular and powerful Focus RS will not get a successor based on the new, fourth model generation of the Ford compact model. Sad news for all petrolheads who liked the car not only because of its power, but also because of its extrovert design. At the same time, it is clear that the sporty ST will remain the top model in the series. The here presented Focus ST got an even more dynamic look thanks to a new wheelset.

The compact sports car stands on a set of Shoxx rims from Barracuda Racing Wheels, which are equipped with a suitable parts certificate. They have the dimensions 8x19 inches. So they can be combined with the factory assembled tires that measure 235/35R19.

With their striking bronze finish, the wheels skilfully stand out from the simple, white paint of the Focus' and therefore act all the more as an eye catcher. For a better alignment in the wheel arches, the car also received a set of H&R springs for lowering.

Breathtaking videos from Barracuda are available on the "Barracuda Racing Wheels" YouTube channel or the "barracuda.wheels" Instagram profile. The light-alloy wheels from the extensive Barracuda range of rims are available at car dealerships as well as well-stocked tire and specialist stores. Alternatively, they – along with all additional facts, including price and delivery information – can be obtained directly from:
