

**Press release, Cor.Speed Sports Wheels Europe:
Challenge rims for the muscle car bestseller – the Ford Mustang**

For many years, American muscle cars were popular here in Germany, but they were hard to get your hands on as they were not officially distributed in Europe by the manufacturers. The only thing that could change this was to become a free importer. In the meantime, however, Chevrolet and Ford had at least gained an insight into what made buying a Camaro or Mustang much easier. As a result, their numbers have ballooned – especially those of the Mustang – over recent years. For drivers who want to stand out from the crowd, it is therefore becoming increasingly important to make their car stand out by customizing the series model. This is what happened to this particular specimen, which has been given a makeover by Cor.Speed Sports Wheels Europe.

The pre-facelift model of the current Mustang series LAE got a set of virile Challenge rims from Cor.Speed's portfolio: They measure 9x20" on the front axle and 10x20" on the rear axle and come with a shiny black finish. The fitted Hankook tires measure 255/35 ZR20 and 275/35 ZR20.

The dynamic look of the sports coupé was also refined by lowering the chassis using ST suspensions lowering springs. And a new sports exhaust system provides an even meatier engine sound.

You can find breathtaking videos from Cor.Speed on the "Corspeed Sports Wheels" YouTube channel or the "corspeed.sports.wheels" interactive Instagram profile. The light-alloy wheels from the extensive Barracuda range of rims are available at car dealerships or well-stocked tire and specialist stores. Alternatively, they – along with all additional facts, including price and delivery information – can be obtained directly from:
