

**Press release, Barracuda Racing Wheels Europe:
Candy-red Ultralight Project 2.0 on a Mercedes C Class Coupe (C205)**

As is well known, a central idea of tuning is customizing the vehicle. An essential starting point for converting your own car into something unmistakably unique is, of course, the rims. The range of wheels on offer from Barracuda Racing Wheels is especially broad and varied. As an option, they can be painted in any desired candy or RAL color – so customers have a practically unlimited choice. An excellent example of the results is this C Class specimen.

This coupe from the current C205 series stands on a set of especially lightweight Barracuda Project 2.0 wheels from the Ultralight series, which sport a striking candy red finish. Their dimensions are 9x20" (€699) and 10.5x20" (€749), with tires measuring 225/35R20 and 265/30R20.

This wheel and tire combination comes with a strength test certificate so that it can be road legal by means of a special registration. KW Variant 3 coilover suspension supplements the finish of the Stuttgart coupe by lowering the front by 45 millimeters and the rear by 40 millimeters.

The high-quality light-alloy wheels from the extensive Barracuda rim range can be found at car dealerships or well-stocked tire and specialist stores. Alternatively, they can be obtained directly along with all additional facts, as well as price and delivery information, from:
