

**Presse release Barracuda Racing Wheels Europe:
Barracuda classic Karizzma on the Munich Power Cabriolet BMW F82 M4**

The Munich mid-range top models are about to be replaced, the new M4 Coupé and the sedan version M3 will be unveiled shortly. The current convertible F82 still has a grace period and will not be replaced until 2021. In any case, there is no urgent need for action in this respect, after all, the current model is still one of the most attractive representatives of its class. This is all the more true if the long-running M, like this one, has been equipped with a set of high-quality Barracuda Racing Wheels and other refinements.

The Barracuda cooperation partners from cardiologie Tuning from Bergisch Gladbach installed the Barracuda Karizzma rims in 9x20 inch ET27 and 10.5x20 inch ET35 with 265/30 and 285/30 tires in the wheel arches. With their matt black finish called "PureSports" they go perfectly with the paintwork of the body. The same applies to the tailpipes of the exhaust system, which are also colored accordingly.

A further optimization of the dynamic appearance of the M4 is the lowering by means of Eibach sport springs. And last but not least, the twin-turbo in-line six-cylinder, which is already powerful ex works, now generates not only up to 520 PS and 680 Nm thanks to a stage 1 software optimization, but thanks to the lifting of the Vmax limit it even reaches more than 300 km/h.
