

**Press release Cor.Speed Sports Wheels Europe  
Cor.Speed Kharma in special size on Audis mid-engine sports car R8**

Enthusiastic mid-engine sports cars come from Italy! Or maybe France or England. That may be true, after all the first association that has manifested itself over decades is seldom deceptive. But it's only half the story, because of course there were always corresponding models from other origins. For example the R8 from Germany, which Audi rolled out for the first time in 2006. This facelift model of the first model generation was equipped with a set of high-quality rims from Cor.Speed Sports Wheels.

The specialists from Aerotechnik Fahrzeugteile AG from Switzerland, who are responsible for the conception and production of the rims of this brand, together with the team from JMS Fahrzeugteile from Walddorfhäslach, equipped the V10 sports coupé with the weight-saving flow-forming Kharma wheels.

The rims, which have a striking, asymmetrical design and a finish in high-gloss bronze brushed, are used here in 9x20 inches on the front and the special size 10.5x20 inches on the rear axle. The mounted Continental high-performance tires measure 235 / 30ZR20 and 305 / 25ZR20. In addition, a chassis optimization was implemented.
