

**Press release for JMS Fahrzeugteile GmbH:
Lowered BMW M6 E63 with 19" wheels and Supersprint exhaust**

At the moment, BMW is gradually launching all of its new 8 Series models. Among these is the second sequel to the E63 – a 6 Series model that remains popular and very much in demand, including on the tuning scene. This M6 specimen, which features components modified by JMS, very much demonstrates this point.

The axles on this V10 sportster are mounted with OZ Ultraleggera rims measuring 8.5x19" (€515) and 10x19" (€541), which are fitted with 255/40 and 285/35 tires. Their dark tones are also mirrored in the carbon-look wrapping on parts of the dark-red bodywork (available on request).

From a technical angle, a specialist JMS/H&R spring set (€387) combines with standard shock absorbers to lower the chassis by around 30 millimeters, and the M6 also features a high-performance Supersprint exhaust system complete with X-pipe (€2,799). Further components, such as performance enhancements, are also available on request.

You can find high-quality JMS products at BMW dealerships as well as at well-stocked tire dealerships and specialist retailers. Of course, you can contact us directly for all other facts as well as price and delivery information for the entire JMS Fahrzeugteile product range at:
