

Press release JMS Fahrzeugteile GmbH Performance Messe Part V: the tuning mega event in Swabia on September 7th

Originally born out of necessity in Corona times, it has long since developed into a highlight of the tuning scene and an absolute must for petrolheads: the Performance Messe by JMS Fahrzeugteile. Over the years, the trade fair grew steadily, with more exhibitors and visitors joining each time. This development should of course continue on Saturday, September 7th, 2024, when the Performance Fair Part V takes place. As usual, the venue is the Motorworld Village Metzingen, located about 40 kilometers southeast of Stuttgart.

Once again, the performance fair will offer a wide-ranging program. An integral part and undoubtedly a special feature of events of this type is the live stream via the JMS Fahrzeugteile YouTube channel. This means that interested parties who cannot be there on site can attend virtually. Moderated by William De Fensfooster, Jochen Schweiker and Sabrina Doberstein – known from fashion and television and Barracuda brand ambassador since 2018 – numerous show cars and products from the exhibiting companies will be presented. Speaking of which: the number of well-known companies taking part has once again increased to over 30 brands. The diverse range extends from B for Barracuda Racing Wheels to V for VM Line. In addition to their appearances in the stream, the exhibitors are of course looking forward to lively conversations with visitors at their stands in the forge hall or on the outdoor area all day long. They will be taking along trade fair prices with big discounts. Celebrities such as “die Tuning-Profis” and well-known influencers will also not miss the performance trade fair and will be there live on site.

Other highlights of the performance trade fair will include the Driftinglele team's unique wheel changing competition. The three fastest participants should be happy about winnings. The same applies to the three best competitors in the RC Cars Racing competition organized by Forminline in Hall 6C, where everything is focused on motorsport. Other fun activities include a “Hau den Lukas” and a boxing machine as well as a bouncy castle for younger guests. Finally, the vehicle reviews of selected cars, including the award ceremony and trophy presentation as well as the introduction in the live stream should not be missing. And of course food and drink are also provided.

The starting signal for the Performance Fair Part V is 11:45 a.m. In order to secure a place, visitors are advised to purchase tickets in advance online via jms-fahrzeugteile.de. Although the parking situation has been optimized for 2024, early arrival is still recommended. Visitor parking is also possible at Bongertswasen, two kilometers from the event site. A free shuttle bus runs from there.

When the trade fair gates at the Motorworld Village close at around 7:15 p.m., the event is far from over. Rather, the night continues at full speed: the big after-show party takes place on two floors at the La Fontaine club in Reutlingen from 8:30 p.m. to 3:00 a.m. Of course, celebrities, influencers and the exhibitor teams are also participating. The way between Metzingen and Reutlingen can also be done with a free shuttle bus that runs between the locations until 1 a.m. Car-loving ladies and influencers can alternatively take the stretch limousine to the club. For complete participation in the trade fair and after-show party, there is a combination ticket priced at 12 euros. The pure day ticket for the trade fair costs 5 euros.

JMS Fahrzeugteile, as the organizer of the Performance Messe Part V, cordially invites representatives of the press and TV to take part in and report on the event. Access to the event site is free upon presentation of a press pass!

Last but not least applies once again to all fans who cannot follow the trade fair on-site or online on the actual day: The live stream will of course be recorded and can therefore also be accessed later via the JMS YouTube channel in re-live.

Further information about the Performance Messe Part V and of course all the facts as well as price and delivery information about the entire JMS vehicle parts program can be found directly from:
