

Press release Cor.Speed Sports Wheels Europe
Cor.Speed meets ct.w Vogtland: Atmos for the Audi RS 6 Avant

With the Atmos, a true flow forming highlight was added to the program of the renowned lightweight alloy wheel forge Cor.Speed Sports Wheels last year.

The Atmos, with its delicate multi-spoke design, not only appears visually very "light," but also confirms this impression on the scale: Even in the massive 11.5x22-inch size, this wheel, available in High Gloss Silver and High Gloss Black, weighs only 15.6 kg. This reduces the unsprung and rotating masses of a vehicle, which has a noticeably positive impact on its driving dynamics and comfort.

This is also the case with the Audi RS 6 Avant of the current C8 generation shown here, which has been customized by the team at ct.w Vogtland from Oelsnitz. In the wheel arches of the high-performance estate with quattro all-wheel drive, the Atmos rotates in high-gloss black all around in the 10.5x22-inch size, fitted with Hankook tires in 285/40R22. For a lowered look and even sharper handling, additional threaded springs from H&R have been added.

Currently, the Cor.Speed Atmos is available in sizes ranging from 9.5x20 to 11.5x22 inches. Starting next season, this range will be rounded off at the lower end with new sizes of 9.5x21 and 10.5x21 inches.
