Upgrades for the exotic Smart Roadster Coupé: 17 inchers and more...

Even its ultra-short production time of just under two years makes it somewhat of a rarity not seen everyday on the streets: Only about 19,000 specimens of the Smart Roadster or Roadster Coupé were ever approved in Germany. Today, the number of these vehicles in circulation is of course much lower. But this does not stop some owners from making their pint-sized pride and joy even more unique. Take this coupé reworked by JMS Fahrzeugteile, for example.

The specialists from Walddorfhäslach have fitted the front with one of the few tuning components available on the market: their Racelook front spoiler lip. The silver-painted two-seater was also lowered by 40 mm at the front and 60 mm at the rear thanks to a set of KAW springs. The 17" light alloy rims and the new exhaust system come from the portfolio of the smart specialists at CS Tuning. Of course, all components come with a valid parts certificate.

The high-quality JMS products are available at car dealerships, well-stocked specialist retailers, or directly from JMS Fahrzeugteile (www.jms-fahrzeugteile.de). All other facts, as well as price and delivery information, regarding the entire JMS Fahrzeugteile program are available from:
