

Press release JMS Fahrzeugteile GmbH:

Black 'n' Red: V-Class on Schmidt rims in the special color "Gloss Red"

Red cars with black rims are familiar. But if you reverse this color scheme, you get a real eye-catcher – like the Mercedes-Benz V-Class shown here. The unusual premium van was put on its wheels – in the truest sense of the word – by JMS Fahrzeugteile.

The tuning specialists from Neckartenzlingen equipped the pre-facelift model of the recently facelifted 447 series with an 8.5x20-inch set of Schmidt TwentyOne alloy wheels.

And as if the TwentyOne, characterized by an asymmetrical three-dimensional combination of Y and V spoke design, wasn't already eye-catching enough in its standard finishes, JMS increased the extravagance even further with the special color "Gloss Red". The one-piece wheels are covered with Michelin Pilot Sport 4 S tires measuring 255/40R20 all around.

For a striking lowering of the V-Class, which is dressed in the AMG Line outfit, JMS Fahrzeugteile also installed a KW coilover suspension of variant 3, which allows the setting of an individual setup thanks to its separately adjustable compression and rebound damping.

All further facts as well as price and delivery information about the entire JMS Fahrzeugteile range can be found directly at:
