

BARRACUDA

ULTRALIGHT SERIES

Press Release, Barracuda Racing Wheels Europe: Project 3.0 wheels on the hot hatch Hyundai i30 N

The popularity of the Korean hot hatch Hyundai i30 N in the tuning scene does not stop, even about two and a half years after its market launch. And so now another - presented here by the brand ambassador Sabrina Doberstein - was equipped with a set of high-quality Barracuda Racing Wheels of the 275 hp hot hatch.

Project 3.0 rims from the Ultralight Series, which are particularly light thanks to the FlowForming process, are installed on the axles. They measure around 8.5x19 inches (weight: 10 kg). The special color Flash Red was chosen for the wheels to match the red paint on the body. The milled edges of the black Y-spokes are red - in the sun they look like a ray of light in the shadow.

Breathtaking videos from Barracuda are available on the "Barracuda Racing Wheels" YouTube channel or the "barracuda.wheels" Instagram profile. The light-alloy wheels from the extensive Barracuda range of rims are available at car dealerships as well as well-stocked tire and specialist stores. Alternatively, they – along with all additional facts, including price and delivery information – can be obtained directly from:
