

**Press release Barracuda Racing Wheels Europe / Cor.Speed Sports Wheels
Brand new wheels catalog 2023 available now**

The trendy brands Barracuda Racing Wheels and Cor.Speed Sports Wheels, which stand for high-quality alloy wheels, are presenting their current programs in a brand new, joint wheel catalog for 2023. This is themed "Outstanding Designs", which perfectly describes the wheels in the respective product ranges.

After all, the styling of the Barracuda and Cor.Speed wheels is always up to date - from the lightweight Barracuda Summa rim in sizes from 17 inches (from just 7.2 kilograms in weight) to the Cor.Speed Deville in huge 11x23 inches. The wheels often attract attention with special accents such as brushed surfaces, colored trims or flash paint. They also inspire with their wide range of applications.

The 2023 catalog offers a comprehensive overview of all designs from both brands. Of course, there are some innovations to be discovered, such as new applications and sizes for the flow forged wheel Project 2.0 from Barracuda's Ultralight Series. For example, it is now available in 22 inches for the upper class electric car brothers Audi RS e-tron GT and Porsche Taycan. The absolute highlight is undoubtedly the completely new Atmos Cor.Speed wheels. It is characterized by a filigree multi-spoke design and will be available from May 2023 in the dimensions 9.5x22 inches and 10.5x22 inches.

To round it off, the catalog with its numerous vehicle illustrations also serves as a great source of inspiration for interested parties who are looking for a suitable new set of rims for their own car. The catalog is available to retailers free of charge and can be requested directly.

Stunning videos are available on the Barracuda Racing Wheels and Corspeed Sports Wheels YouTube channels. The light-alloy wheels from the extensive Barracuda and Cor.Speed wheel programs are available from well-stocked tire and specialist dealers or from tuners or directly from JMS vehicle parts (worldwide general sales except Switzerland). Alternatively, they are available, along with all other facts, as well as price and delivery information, directly from:
